Project

MBE Troyes

Parcel quotation web app

- Back-end **Spring Boot** REST API (Security/Mail ...)
- Authentication **JWT** + HTTP Only cookie
- Front-end **REACT JS**
- **Maria DB**
- **Amazon AWS** hosting

Formation

Master STIC M2 (University of Poitiers - 2006) with high honors

Fondement et Ingénierie de l'Informatique et de l'Image - Spécialité Pro.

Langues étrangères

French Native

English TOEIC 950
International teamwork (U.S.A./India)

Japanese JLPT N2 degree – Moderate level

German High school level

Profile

After passing my Master with professional specialty (business creation, team and risk management) I joined Cerner France as a software engineer. I can now manage a whole project from understanding client needs to functional testing and installations. I also had the opportunity to train new recruits and work with international teams from Ireland and India. At the same time I developed as an independent site for a franchise of the parcel group MBE. I analyzed client needs, made the suitable technical choices (e.g. React JS, REST API) and helped for testing and installation.
